

Congratulations to the winners of the XV Olympiad on Electronic Circuit Theory "TEK'2022"!!!

On November 21, 2022, the XV Open Student Olympiad on the Electronic Circuit Theory was held in on-line mode. The Olympiad is held annually by the Electronics Engineering Department of the Faculty of Electronics and is dedicated to the memory of Professor Vitaly Petrovych Sigorsky, an outstanding scientist and teacher who worked at our university from 1964 to 2007.

This year, the Olympiad coincided with the celebration of the 100th anniversary of the birth of Prof. V.P. Sigorsky (<https://www.youtube.com/watch?v=o5XJSEtK-uk>), therefore this date gave special importance to the Olympiad and the opportunity to participate in it. Despite the extremely difficult circumstances in Ukraine for participation in the Olympiad, more than forty students from many technical departments of NTUU "Igor Sikorsky Kyiv Polytechnic Institute", as well as Taras Shevchenko Kyiv National University and Telecom Paris University registered to participate in the Olympiad.

The victory was won by:

1st place - Dmytro Zaruba (DM-21mp, FEL, NTUU "Igor Sikorsky Kyiv Polytechnic Institute"),

2nd place - Oleksandr Bilyi (DM-11, FEL, NTUU "Igor Sikorskyi Kyiv Polytechnic Institute"),

3rd place – Mahreen Khan (ISC department, Telecom Paris, France)

We thank everyone for participating in the Olympiad and for the high results achieved, and we invite you to the XVI Olympiad «TEK'2023», which will take place next November. The announcement will be posted on the website <https://kpi.ua/>
